Press Release for IJSBA 2023

Once just the destination for your hydration now proudly the concierge for your health, our fantastic staff of registered nurses have been providing the community of Lake Havasu with IV infusions, wellness injections and esthetics since 2019.

While our health and wellness menu of services expands and grows, we continue to offer our foundation services of IV infusions and vitamin injections, both in our relaxing clinic and mobile, directly to your location.

For the fifth year in a row, our amazing team will be set up at the World Final Jet Ski Races to provide IV infusions and injections to participants and staff. We look forward to seeing you all back this year!
